Launch of “Radiant” – Fan
120mm Extreme Performance RGB Fan

HONG KONG, 21 November 2018

Thermal Solutions specialist *GELID Solutions* unveils the latest 120mm case fan with advanced RGB LED lighting and top-notch cooling technologies. The *Radiant* is a product of GELID Solutions GAMER product line.

The *Radiant* is designed specifically for gamers and overclockers. It integrates 9 circularly mounted high-brightness full-color RGB LEDs and supports variable color modes via motherboard controls or the optional GELID RGB LED Multi-Fan Controller. The *Radiant* features the newest *High Precision Shark-Tooth Blade* technology, a 3D optimized impeller with the dramatically improved static pressure characteristics for super-high airflow and low-noise operation. It also comes with the carefully selected top-quality Double Ball Bearing to enforce mechanics and to guarantee ultra-durable functioning. The newly designed PWM IC, a core part of *Radiant*, eliminates any clicking noise of the fan. Additionally, the intelligent GELID PWM (Pulse Width Module) drives the fan in extended speed range from 500 RPM to 2000 RPM, it constantly keeps the fan silent but accelerates speed according to heat-source load.

The fan is RoHS and WEEE conform and carries a 5 year warranty.

“Nowadays, RGB fans represent a key component of high-class gaming PCs. Our newest Radiant brings to life a perfect combination of colorful RGB LED lighting and supercharged cooling performance that you can count on”, said Gebhard Scherrer, Sales Director of GELID Solutions Ltd.

The *Radiant* is available now and has a MSRP of USD 14 or Euro 12.50.
